THE SOLUTION

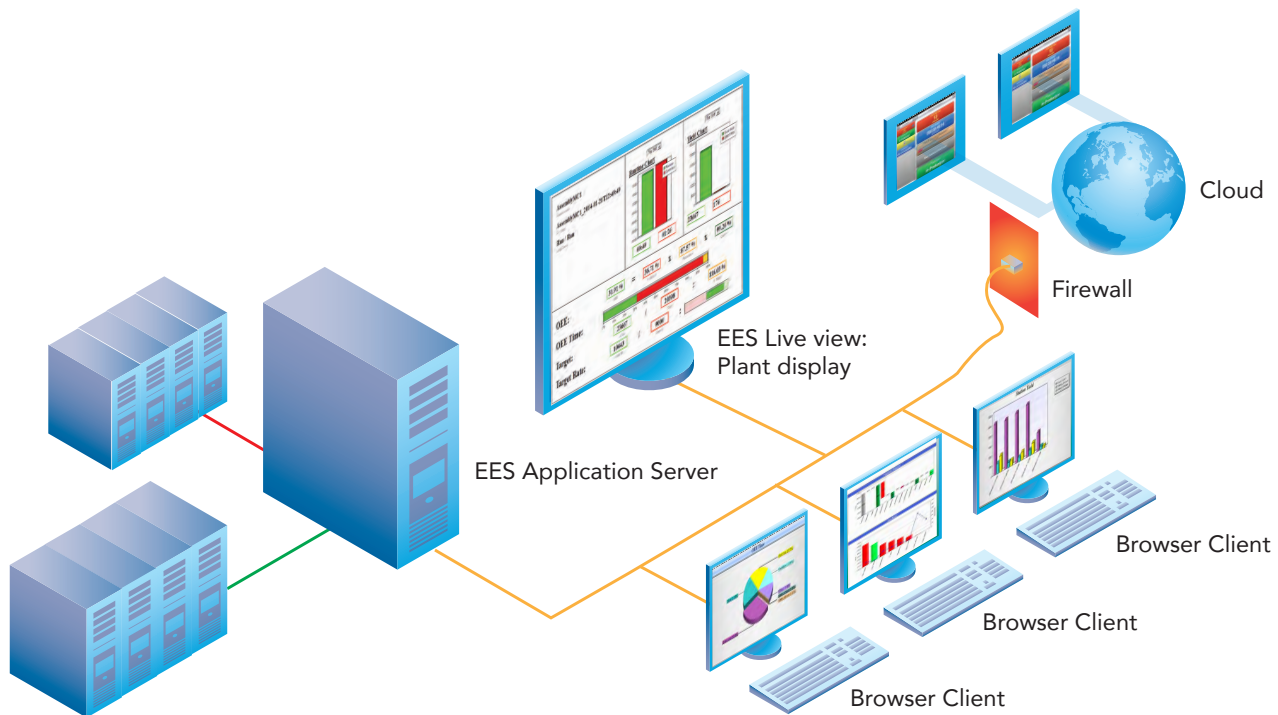

Equipment EffectivenessSuite

- Is your plant automation at a point in your journey where you are ready for an equipment effectiveness monitoring solution that's simple, takes days to implement and has a low initial investment?
- Are you using paper spreadsheets to keep up with the operational effectiveness of your production equipment?
- Frustrated with having to wait to get reports when you want them, how you want them?
- Are you tired of not having flexibility to report operational effectiveness over different time periods or against variables?

If any of these feelings are familiar to you, then you are not alone; our users tell us all the time this is why they choose our solutions.

Equipment Effectiveness Suite (EES) is the solution.

What people are saying:

EES gives us a powerful OEE solution we can provide to our customers at a fraction of the cost of other OEE packages.

~ Matthew James,
ProActivity Automation, LLC

The product is very helpful in reporting what's happening on my production floor and gives us valuable information to help us improve our processes. I would highly recommend it.

~Stephen Shakelford,
Sekissui S-LEC America

I was looking for an equipment performance monitoring product for my clients that works, is easy to configure, fast to roll out, has an open integration platform, delivers relevant information and is value for the money and I didn't have to look any further than the EES product.

~Gordon Schoombie, Systems Anywhere

Real-time functionality

Monitoring: Machine Up? Down? Why?

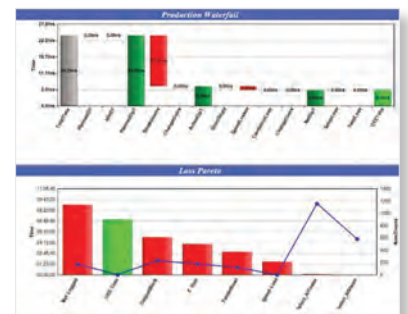

Start finding your losses and increase productivity within days with our web-based OEE monitoring solution.

- Enables comparison of production parameters: Part, Shift, Machine, Material, etc.
- Highlights the effect of changes: Material, Part, Operation on Machine Performance
- Complements and easily integrates with your existing HMI, MES, and ERP systems
- Browser-based access for any number of users; no software needed on user computers other than a compatible web browser

Reporting: Dynamic and flexible.

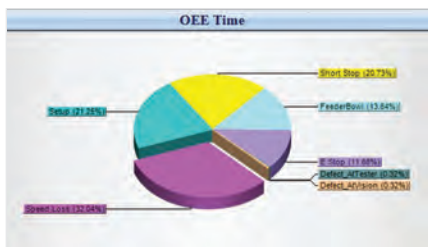

View out-of-the box reports and dashboards anywhere via a web browser or portable device.

- Provides instant visibility of OEE, Yield, Downtime, etc.
- Report generation wizards make it easy for users to generate their own reports without programming
- Deliver reports automatically by email on a schedule you define, using Excel, PDF, HTML formats
- Connect to all types of production equipment via industry standard interfaces
- Reports at right are just a sampling of the many possibilities with EES

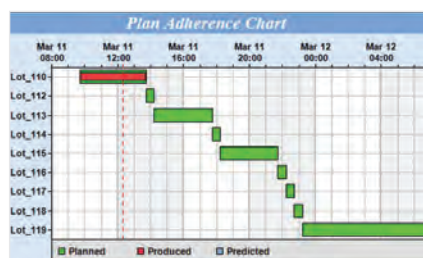

Waterfall

Understand where operational time is lost

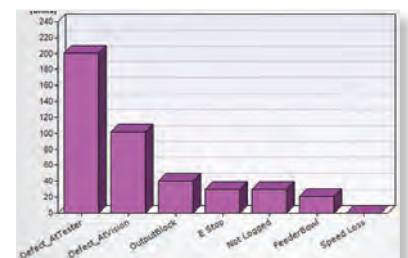

OEE Time

Breaks down production and time loss

Plan Adherence Chart

Going beyond just operational effectiveness; optional Plan Adherence module monitors production targets

Loss Pareto

Identify root causes of production losses

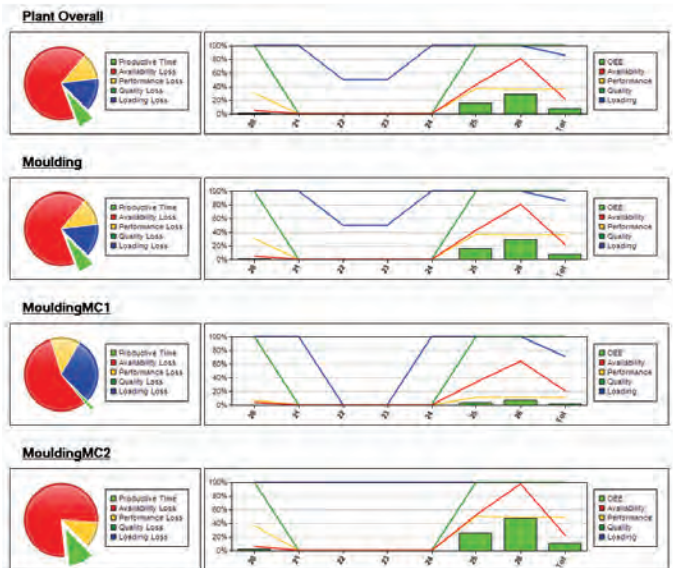

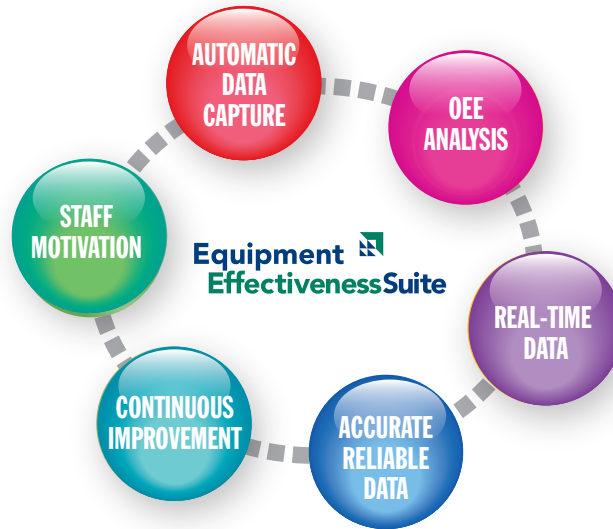

Why EES is your solution

ROI within weeks!

Install and start collecting data within hours. Start saving within days.

- Modular, server-based, browser-delivered software application
- License what you need
- Installed on one PC
- Be up and running in few hours
- Simplified for ease of use without losing flexibility
- Delivers insights as actionable information that empowers your ROI

Plant Wide Rollup

Discover how your operations are running at the line level and plant-wide level

Software Toolbox brings EES to you and provides:

- A trusted name in automation software since 1996
- World-class service that starts with a live person answering the phone
- Expert knowledge in a variety of industries
- An international client list
- Professional and friendly service focused on your need for fast results
- Cost-effective, real-world solutions
- A versatile product line that maximizes your manufacturing software results

Equipment Effectiveness Suite

Equipment Effectiveness Suite is one of the variety of products offered by Software Toolbox. Clients around the world turn to Software Toolbox for our variety of industrial automation software products, combined with our knowledge of how our products work together with other enterprise products using open standards and our world-class support. This unique combination delivers value for your projects throughout the full life-cycle of your automation journey. equipmenteffectivenesssuite.com
